

PadPak[®] LC PLUS

Fast handling,
economical to use

Cost efficient

Less material is needed to provide optimal protection

Time savings

Pads are created at high speed with minimal reloading necessary

Ergonomic

Easy to handle bundles of paper, has several operating modes including EDS and batch

The high speed solution for light cushioning and void fill

The PadPak LC Plus is the fastest paper cushioning solution on the market. The highest output allows a maximum box throughput. The converter forms single layer paper into pads which can be used to protect products during shipment. The individual bundles of paper, with gluing strip, ensure the converter is easy to load and run at high speed. The paper pad can be used for cushioning, fixating or wrapping.

Go Green

Our company works with FSC and SFI certified suppliers. Paper is climate neutral, recyclable and also a renewable source.

Specifications of the system

Converter

- Dimensions: 33" x 44" x 48" - 63" horizontal position
- Weight: 220 lbs.
- Power: 110 VAC
- Cut Method: Electronic Motor

Paper

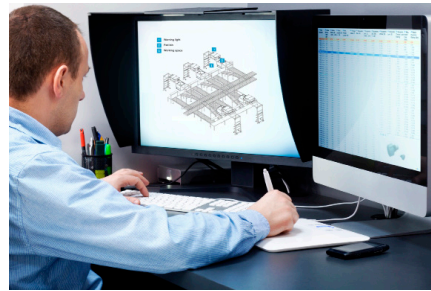

- Base weight (lbs.): 45, 55
- Pack length: 1,200", 1,000"
- Paper width: 30"
- Pack weight: 45 lbs.

Our Added value

Packaging Engineering

In our packaging lab, Ranpak analyses your current packaging solution. Using a drop test, our engineers can show exactly how much shock is transmitted to your products through the packaging. Ranpak then suggests alternatives how to improve protection or save costs.

Integrated Applications

The Ranpak Custom Engineering department can design structures, frames and other innovative solutions to integrate the packaging converter anywhere around, above or under a packing area.

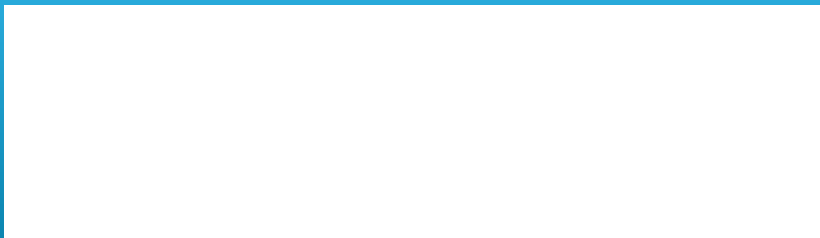

Packaging Training

Training from our packaging experts will help your packers to use up to 20% less packing material, without compromising the integrity of the packaging.

Successful in these industries

Automotive	Chemical/Plastics	Cosmetics	Electronics
Food/Beverage	Industrial Parts	Machinery/Engines	Warehouse
