

Geami WrapPak® M

Low volume wrapping solution

Small footprint unit:
Manual Edge

NEW

ABOUT THE SOLUTION

Geami WrapPak is the combination of a patented die cut kraft paper with a tissue interleaf.

The Geami WrapPak M expands the die cut paper into a 3D honeycomb structure. In combination with the tissue interleaf, it provides a unique wrapping product.

- + Excellent surface protection and great unboxing experience
- + **Both standard and heavy duty paper configurations available**
- + Simple and easy packaging solution
- + No need for electricity
- + No need for tape due to interlocking paper structure

NEW

PACKAGING NEEDS

The Geami WrapPak M is ideal in lower volume packaging environments. It can be placed anywhere without the need for electricity. In e-commerce environments where the main goal is to maximize ease of use while offering customers an attractive unboxing experience, Geami WrapPak is the perfect solution.

NEW

FRAGILE PRODUCTS TO WRAP? Use the new **HD** die-cut paper with improved performance

Besides the standard die-cut kraft paper, a heavy duty (HD) die-cut kraft paper is now available to work in conjunction with the Geami WrapPak M and Geami WrapPak M Edge. HD die-cut paper distinguishes itself by the large honeycomb cells. The cells have twice the size of the standard die-cut paper cells resulting in improved protective performance. With its robust and voluminous look and feel, it is very suitable for wrapping fragile and flat surface items within industrial segments as well as general purpose items in miscellaneous industries.

1. Improved protective performance
2. Cost efficient solution
3. Green replacement for 1/2" bubble

Geami WrapPak[®] M **EDGE**

DO YOU HAVE SPACE CONSTRAINTS?

The Geami WrapPak M Edge is part of the manual product line that is a great solution for pack stations with limited space. The unit can be placed at the back end (edge) of the packing station, keeping the work area free for other activities. Both standard and HD paper can be used in conjunction with the Geami WrapPak M Edge.
