### The Paper Packaging Experts<sup>™</sup>

Control Measurement unit provides operational data

### Time savings Automatic calculation of paper amount leads to improved labour efficiency

# The solution for **controlling material costs** in high volume packaging operations

The AccuFill consists of an in-line measurement system which determines the exact amount of empty space in a shipping box. It then signals the FillPak converter to dispense the optimum amount of paper needed to fill up the empty space in that specific box, processing up to 10 boxes per minute. The products will be protected during shipment and arrive at their end destination damage-free.

### Go Green

Our company works with FSC® certified suppliers. Paper is climate neutral, recyclable and also a renewable source.

### Specifications of the system

### Converter

- Dimensions: 90x97x235 cm
- Weight: 176 kg
- · Power: 200 Watt
- Frequency: 50/60 Hz
- Speed: 0.8 1.2 1.4 m/s
- · Cut method: automatic

### Measuring unit

- Width: 82 122 cm
  - Depth: 35 cm
    - Height: 214 249 cm
    - Weight: 100 kg

## **Our Added Value**

### Packaging Engineering

Ranpak analyses and reports on your current packaging solution. The drop test shows exactly how much shock is transmitted to your products through the packaging. Ranpak then suggests alternatives how to improve protection or save costs.

### Integrated Applications

The Ranpak Added Value department can design structures, frames and other innovative solutions to integrate the packaging converter anywhere around, above or under a packing area.

## Successful in these industries

Logistics	Apparel	E-comme
Toys & Sport	Cosmetics	Comput

### Your Ranpak Distributor

### Paper

- Base weight: 50 gr/m<sup>2</sup>
- Pack length: 500 m
- · Paper width: 76 cm
- Average pack weight: 19 kg
- Average yield: 3 m<sup>3</sup>

# Packaging Training

Training from our packaging experts will help your packers to use up to 20% less packing material, without compromising the quality of the packaging.
