

PadPak® Guardian™

The sustainable, compact, simple protective packaging solution

PadPak® Guardian™ is the compact, simple cushioning solution for fast production of sustainable packaging pads. It combines multiple benefits in one converter with a significantly reduced footprint. Its compact size and fast throughput make it ideal for many packaging environments, from automotive to e-commerce and more.

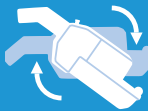

PadPak Guardian is designed to fit into smaller packing stations or in-line for better production flow and use of space. It's easily moved and adjusted to the best height for individual applications. Pads can cushion both light and heavy items.

Space Saver

Compact footprint, with reduced size and weight.

Flexible Ergonomics

Adjustable working angles and easy maneuverability.

100% Sustainable

Curbside recyclable, biodegradable and entirely paper based.

PadPak® Guardian™

- An effective and sustainable alternative to plastics and foams with the option to convert double or single-ply bundles into strong or flexible paper pads.
- Easier servicing with six individual modules that can be quickly removed and replaced for minimized converter downtime.

Ranpak®

Deliver a Better World™

More Flexibility and Efficiency

PadPak® Guardian™ can be tilted to various angles for added versatility and the convenience of having pads delivered directly to where they are needed. Two different heights of the converter are available, the standard Floorstand height and the lower Tablestand option, allowing the flexibility to choose the ideal solution.

PadPak® Guardian™

Go Green
with Sustainable
Packaging

Our company works with FSC and SFI certified suppliers. Using paper that is 100% compostable, 100% biodegradable and 100% curbside recyclable, we offer a complete paper-based delivery method.

At Ranpak, what's good for the environment is also good for business and the bottom line.
